

I want to take a minute and say what an amazing Job of social distancing the citizens of Electra are doing. The restaurants in town and the bars have either closed or serving to go only. The Dollar General is doing an outstanding job of serving many of the needs along with Allsup's. Electra Memorial Hospital and Tri-Med Ambulance service is providing health care services as usual.

As of 3:00 pm March, 27 2020 the City of Electra has NOT been made aware of any positive Covid-19 cases.

The Wichita County Health District is the Health Authority for the City of Electra and has assured us that they will notify us when we do have a positive case inside the city limits of Electra. We will relay the information on our web page, www.cityofelectra.com and our Facebook page.

We are currently working with Wichita County and the City of Electra Attorney to determine the next step in the battle against Covid-19. We are expecting Wichita County to issue the same type order as Wichita Falls in the very near future.

We are all in this together and we are concerned with your health. Please take care of yourself and others by continuing to social distance, cover your cough with your sleeve, washing your hands, do not gather more than 10 people inside or outside.
